Browsing the internet you have found an English forum where several people are sharing their opinions about school uniforms. You would like to take part in the discussion, too. In a post give your opinion in about 120-140 words writing about

- the price of the uniform;
- the comfort of the uniform;
- appearance;
- regulations in your school.

Hello!

I'd like to share my opinion with you in this post about school uniforms. I completely disagree with this idea. By the way school uniforms aren't that cheap, so it could be a problem for some families to buy some clothes, wich the kid would never wear, when he or she is not in the school.

They say a uniform can hide the differences. But is it really the goal? We don't want to have unique people, just a mass of students.

Everyone has a special taste. That make the world so exciting. School uniform can break down individuality. All children hate the uniform because it doesn't look very great. In my school there aren't any regulations, teachers aid the children to be unique and help them to find their personality.

A.T.
